

# Hinchinbrook Re-Seal Program

OUR PROJECTS

**Project Name:** Hinchinbrook Shire Council Annual Re-seal Program

**Client:** Hinchinbrook Shire Council (HSC)

**Value:** \$1.7M

## Project Description:

This project involved the provision of project management, supervision and inspection services for the 2008/09 and 2009/10 HSC annual re-seal programs.

The program consisted of 345,000 m<sup>2</sup> of C170 bitumen re-seal, together with the co-ordination of preliminary maintenance works and supply of pre-coated aggregates. Allciv acted as the Superintendent's Representative in the contract and completed all inspections and contract administration on behalf of our client.

The success of our involvement lead the HSC to extend our scope of work to include the management and supervision of the annual insitu stabilization contract which consisted of 80,000 m<sup>2</sup> of cement stabilization with a 7mm primerseal.

This project highlights our ability to tailor our services to meet our clients' needs through a core cadre of experienced flexible staff.

Key elements of the works included:

- Initial site inspections and ground proofing roads for re-seal.
- Preparation of the detailed project scope to accommodate a fixed budget constraint which included the identification of preliminary works such dig-outs, shoulder cutting and pavement rehabilitation
- Co-ordination and supervision of all preliminary works
- Co-ordination of the sealing contractor and the supply of pre-coated aggregate
